

ACTUALIZING INTEGRITY

VALUE: INTEGRITY

PRINCIPLE: We will be honest and just.

INDICATORS

1. Consistency across the state with spending (Fiscal Committee)

- Community resources are identified and information captured in one place for each team and reviewed monthly at team meetings.
- Provide regular spending reports by team/counselor to be used by teams to develop more consistency in spending practices.

2. Remove barriers to effective/efficient services by blurring county lines

COMMENTS:

- Informed consumer choice is key.
- Need to develop consumer options for deciding which office to work with.

3. Reduce our use (paper/postage/supplies — technology initiative)

- Use online forms rather than pre-printed forms.
- Set up all computers to duplex when printing where possible.

4. Identify boundaries in Orientation (re: confidential communication)

- Provide access to consumer success stories and other visual-learning tools such as the new picture flow chart and VR services videos for consumers to do self-orientation.
- Determine need to continue orientation as currently designed or provide individual orientation instead of group orientation.

5. List resources on Next Steps form

6. Have contact with adults in planning at least once every 30 days

7. Revisit placement standards re: contact with businesses

COMMENTS:

- Insert placement contact standard.
